## *Lawyers who help your business blossom*

In an increasingly globalised world, the opportunities to do business in Japan and for Japanese companies to do business abroad have increased significantly. Eversheds has created a team of experts who can provide the crucial advice that can make such ventures a success.

### **What we do for clients**

Eversheds is one of the world's leading international law firms with expertise in all the major markets you want to enter. Our team includes a number of Japanese-speaking lawyers based in both the UK and our Asian offices, with significant experience of working and doing business in Japan.

We also work closely with quality law firms in Japan and beyond, to ensure you have people on the ground where you need them. This means you can access a full spectrum of legal services, which can be delivered globally.

Our clients include Japanese companies investing overseas and non-Japanese companies that have operations in Japan or trade with Japanese organisations. You will be dealing with people who talk the language, understand the culture, and who have real experience of working and doing business in Japan.

### **An innovative approach**

We do not just view ourselves as people who deal with the technical details of the law. You will benefit from our commercial knowledge and experience built up through many years of working with clients based in Japan. We can break down barriers, prevent problems before they occur and form a cultural bridge for your organisation.

### **The skills we offer you**

We can advise you on the full range of legal services, including:

- anti-trust
- banking
- construction
- employment
- energy
- environmental regulation
- intellectual property rights and technology transfer
- dispute management
- corporate finance, M&A, flotations, private equity and venture capital
- projects and project finance
- structuring market entry strategies.
